What is an ionizer?

It is a device which uses high voltage to ionize, or electrically charge molecules of air. These machines can be designed to either generate specifically charged ions (all positive or all negative), or to create both polarities.

Allergens such as dust, bacteria, mold, smoke etc are easily inhaled. These particles which are positively charged will be bonded (opposites attract) by negative ions produced by the ionizer. These particles which can be easily be inhaled then becomes too heavy to float around. Instead, they become larger pieces of dirt on the ground where they can be cleaned by normal means.

Studies have shown that natural surrounding such as mountains and waterfalls produce large amounts of negative ions. It is no coincidence that throughout history, mankind has gone to these places to rest and recuperate, particularly from respiratory diseases.

- 250ml
- 1 litre
- 2 litres
- 5 litres
- 10 litres
- 25 litres

For use in Water Air Revitalizer

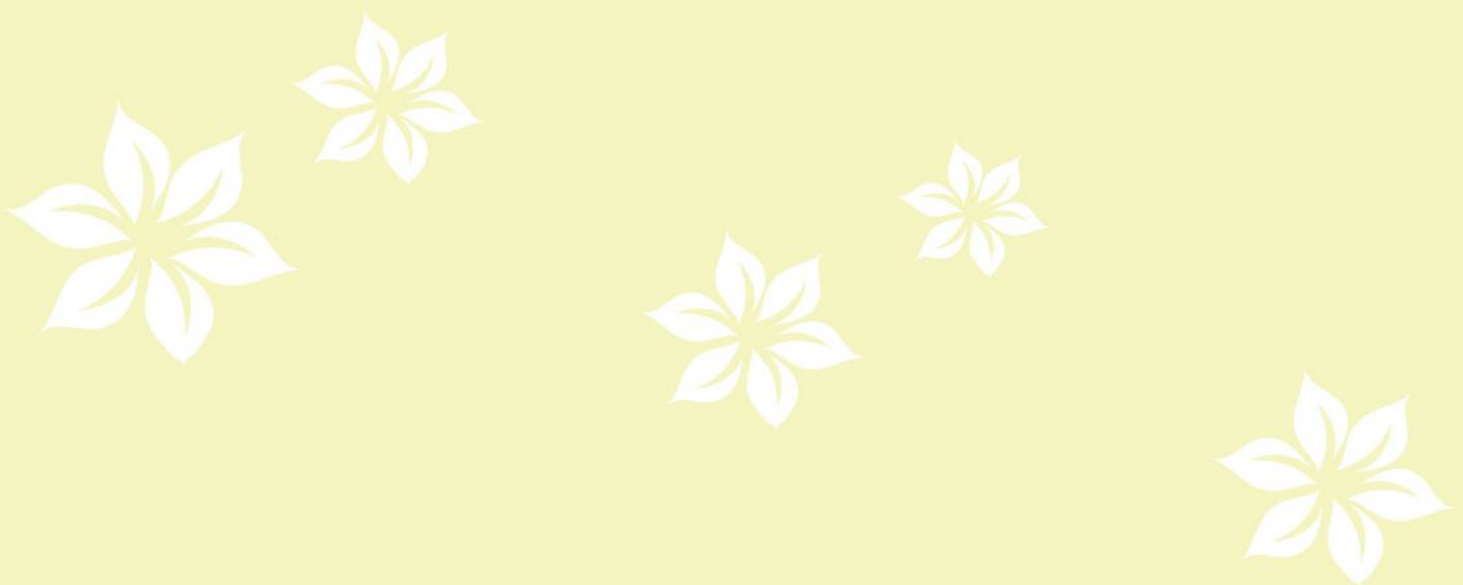

Our aroma essence are formulated from botanical extracts for their anti-bacterial, anti-fungal & deodorizing properties, with the addition of essentials oils for their therapeutic effects. Essentials oil has been known for treating a wide variety of common disorders discomforts & other ailments.

Benefits :

- Removes unfavourable odour & foul smell
- Eliminates airborne bacteria & germs
- Ease allergies caused by dust & air contaminant
- Effectively repels insect
- Aromatherapeutic effects to relieve stress & fatigue

- Nature's Best Gifts! We have the widest selection of scents to choose from.
- Our products are environmentally safe, non-toxic, non-pollutant, non-combustible, bio-degradable and alcohol free.

{ Humidifier / Ultrasonic Misting Device }

“ *Creating healthier and fragrant air .* ”

Model J82

Model J83

Model J88

An ultrasonic humidifier is one that uses high-frequency sound vibrations to produce an extra fine water mist that is then expelled to add moisture to the room.

Model J38

Model J48

Model J98

This type of humidifier is sometimes preferred because it is considered to be safer as there is no hot water present in the unit and therefore no risk of scalding. Since no heating is required in any way, it is also quieter to operate.

Recommendations for care

Fill water container with preferably distilled water or water with low mineral content such as reverse osmosis water to prevent build-up of scale.

Minerals in tap water may increase the development of crusty deposits, white micro-organism, such as bacteria and molds. Breathing mist containing these pollutants is detrimental to health.

Regular cleaning of the humidifier is very important preferably daily or at least every third day. Always switch off and unplug the unit from electrical socket. Empty the water container and use a soft brush or scrubber to remove any scale, deposits or film that has formed on the sides of the tank or on interior surfaces.

{Humidifier / Ultrasonic Misting Device}

Wipe all surfaces dry, refill the water and add our Antimicrobial / Aroma Concentrate which is specifically formulated for use in humidifier to deter growth and neutralise micro-organisms in the water container.

Model J82

Model J83

Since the water is not boiled to produce a mist, there is a risk of bacteria being present in the water (depending on the water source) and being discharged to the room.

Hence, it is recommended to change the water regularly and add our Antimicrobial / Aroma Concentrate to eliminate bacteria in the water.

Model J88

Model J98

Recommendations for use

It is important to use a humidifier when conditions require it, such as in a very dry environment where moisture is needed to relieve physical discomfort of dry nose, throat, lips and skin.

{ Aroma Concentrates }

“ *Enjoy a relaxing, stimulating and refreshing bath / foot spa with our Aroma Concentrates* ”

For bath / foot spa, as air freshener or even room sprays.

For use in Humidifier / Revitalizer

A delightful and natural way to aromatize the room while providing adequate moisture into the atmosphere especially in very dry environment.

It is advisable to use our Aroma Concentrates specifically produced for this kind of humidifier/aroma diffuser.

The concentrates are foam-less and water based as oil based type is unsuitable and may cause damage to the appliance/equipment.

Bath

- Shower body with warm water

• Add 2-3 caps of Aroma Concentrate in a bucket/tub of warm water, wet entire body with it. Or mix 1 cap into water using standard (500ml) sprayer bottle, shaking thoroughly and spray all over the body.

• Leave it on for 15 - 20 seconds, rinse off and rub sea salt or lather body with any bath foam as usual feeling rejuvenated after this process.

Foot Spa

• Place a bucket of warm water with a tablespoon of salt and pour 2 - 3 caps of Aroma Concentrate.

• Pamper and soak you feet for 20 mins to enjoy the wonderful aroma. It is a simple yet important session to revitalize those tired feet.

As Air Freshener / Room Sprays

• Just mix 1 cap of Aroma Concentrate with water in any sprayer bottle and shake thoroughly.

• Spray and freshen the environment and bring nature into your living space.

The effect is less powerful as compared to water air purifier/ revitalizer or humidifier. However, some people prefer a less intense scent and may consider making your very own air freshener spray.

Precautions

- For external use only

• Avoid direct contact with eyes.

In case of contact with eyes, rinse immediately with plenty of water.

- Keep out of reach of children

{ Reed Sticks Diffuser }

“ *Reed sticks diffuser is a room fragrancing product which works on the principle of capillary action.* ”

The system consists of:

- Container made of porcelain or glass
- Aromatherapy fragrance/essential oil refills (refer to our list fragrances)
- Reed sticks

When the reed sticks which are porous and excellent for diffusion, are partially immersed in a container of fragrance oil, the scent travels up the reed sticks and gently permeates the room or office.

It is smokeless, flame-less and maintenance free, gaining popularity in recent years.

Model A7 Purple Set

c/w 120ml Reed Diffuser Refill

Model A7 Red Set

c/w 120ml Reed Diffuser Refill

Instructions

- Simply pour aromatherapy fragrance/reed refills into the reed diffuser bottle or ceramic container.
- Replace old reed sticks with new ones especially when there is a change of refill scent.

Precautions

- Reed diffusers are meant to stand alone and be left untouched.
- Keep the diffuser high and out of reach of children.
- The refills contain essential oils which will stain wood surfaces.
- Always wipe the bottom of your diffuser clean before setting on any surface.

{ Ceramic Aroma Diffuser }

“ *Easy, effective and safe way to diffuse continuous fragrance throughout your environment.* ”

(Birdie)

Ceramic Aroma Diffuser No smoke, drippy wax or the anxiety of burning candles.

The aromatic oils are absorbed up through the ceramic charms and scents are released naturally, enhancing every moment of everyday with splendid fragrance that last for weeks.

(Depending on your surroundings)

Enhance the decor of any space you like. Ceramic aroma diffuser is not only a fragrance diffuser and is also perfect as fragrance home decor. These wonderful diffusers are great for areas such as office, clothes / shoes cabinet etc.

Directions

- 1** Lift up the detachable ceramic figurine.
- 2** Pour the diffuser fragrance into ceramic vase.
- 3** Insert the ceramic figurine into the vase.

Please note: Always set the ceramic aroma diffuser on a level top and avoid painted surface or fabric furnishings. Any spills should be wiped up immediately to avoid staining.

{ Candle Burner / Electric Diffuser / Aromatic Lamp Diffuser /
Car Scenter / Tulip Aroma Diffuser / Aroma Diffuser }

“

This kind of burners have been popular to create a delightful ambience in the home or workplace.

”

Candle burners usually have an opening cut out at the sides to allow free flow of air for candle light which is placed inside. When using this kind of burner, it is necessary to take some precaution such as placing the burner away from curtain or combustible materials to avoid catching fire. Ample ventilation is also necessary, avoid using in an enclosed environment.

Electric Diffuser / Aromatic Lamp Diffuser

is particularly suitable for the home or workplace. They do not pose a fire risk as compared to the candle burner. Moreover it does not burn away oxygen* (in the case of candle burner) and can be used in bedrooms/offices without the need to open windows.

Directions

- 1** Fill half of the bowl / reservoir of the candle burner or electric diffuser with warm water.
- 2** Add or sprinkle 6 - 10 drops of Aromatherapy oil or more, if desired, into the warm water reservoir.
- 3** As the water heats, the Aromatherapy oil evaporates and fragrance the air.
(please refer to our list of fragrances)

{Candle Burner/Electric & Aromatic Lamp Diffuser}

Safe, Clean, Efficient, Reliable &
Water Free

Electric Vaporizer

The electric vaporizer is particularly suitable for the home or workplace as they do not pose a fire risk as compared to candle burner. Moreover, it does not burn away oxygen*(in the case of candle burner) and can be used in bedrooms/offices without the need to open the windows.

Colours Available

- No Oily Hot Water
- No Naked Flame
- No Over Heating
- No Messy Candle Wax

Do not overfill the bowl as aromatherapy oil can cause damage or stain painted furnishings.

Any spills or drips should be wiped away immediately.

Black, White, Green, Beige
Size: (H)5.8 x (W)11.0cm

Grey
Size: (H)7.5 x (W)11.0cm

Directions

- 1 Simply plug into a standard electrical outlet and allow 15 minutes to reach full operating temperature. Self-regulating temperature of 70-80 degree C for subtle and effective vaporization.
- 2 Add or sprinkle 6-10 drops of your favourite aromatherapy oils or more if desired onto the recessed bowl. Do not add or use water for this model as the bowl is shallow.
- 3 As the vaporizer heats, the Aromatherapy oil evaporates and fragrance the air.

{Car Scenter}

A wonderful way to enjoy the benefits of Aromatherapy while you drive

Car Scenter

The car scenter offers a safe and convenient way to enjoy the delightful pleasures of pure essential oils while in the car. To ensure stress free driving, surround yourself with the aromatic aromas of pure essential oils.

Benefits

- Does not overheat
- Is easy to use
- Eliminates spillage
- Is safe to touch

Directions

1. Insert the oil pad

2. Add about 3 - 5 drops of Aromatherapy oil or more if desired into the oil pad.

3. Plug the car scenter into the car cigarette lighter outlet.

- 1 Insert the oil pad
- 2 Add about 3 - 5 drops of Aromatherapy oil or more if desired into the oil pad
- 3 Plug the car scenter into the car cigarette lighter outlet.

{Tulip Aroma Diffuser}

Tulip Aroma Diffuser

This elegant Tulip shaped car aroma diffuser comes with a separate USB interface for Car & PC usages providing you with nice & pleasant scent wherever you are. It comes in 5 beautiful colours to match your car interior with blue LED illumination while in operation. It is also intelligently designed as an emergency hammer that can be used to break car window during a crisis.

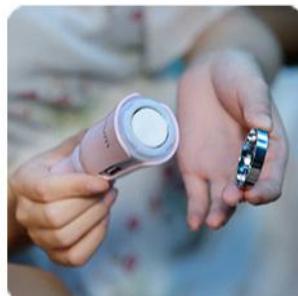

Features :

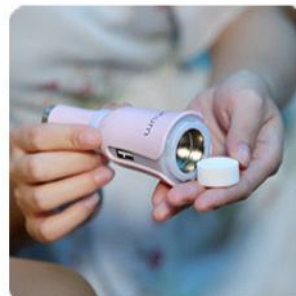

- Aromatherapy on the go
- Is easy to use
- Does not overheat
- Eliminates spillage
- Allows charging of external device while in use

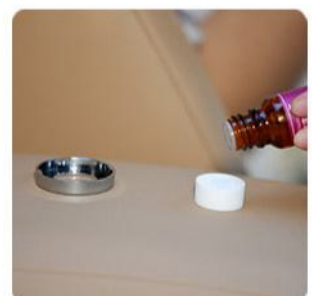

Directions

Hold the top cover, looses and take off the cover by turning anti-clockwise.

Take out the round fragrance sponge.

Drip the aromatherapy oil (10 - 20 drops or more if desired) on the fragrance sponge until it moist completely.

Place the fragrance sponge back into the host.

Aim the cover at four notches of the rim to the host, and then rotate it clockwise until secured.

Plug the tulip aroma diffuser into the car cigarette lighter outlet and slide up the on/off the button.

{ USB Aroma Diffuser }

“ *Enjoy Aromatherapy Like Never Before!* ”

Elegant looking design for better aesthetics with aluminium alloy material which makes this diffuser durable and portable!

{USB Aroma Diffuser}

Key Features

Elegant and stunning look

The beauty of the product is designed with consideration for a better using experience without compromising safety.

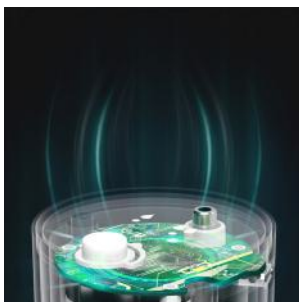

Convenient with USB cable

Universal MicroUSB connector allows seamless connection without worrying about proprietary design which is compatible with most USB Ports. Furthermore, it is compact and reduces space consumption.

Aluminium alloy case

It is durable and tough on corrossions, rigid and light. A grip that feels natural and comfortable.

Compression atomization

A revolutionary technology that exists to directly atomize the molecules in the oil without the use of heating or burning.

This allows the fragrance to spread quickly into the environment while maximizing the fragrance coverage and longevity.

Aromatherapy Oil 15ml

Aromatherapy Oil is made from essential oils and botanical extracts to work hand in hand with this device. Our oils are:

- Environmentally safe
- Non-toxic and non-pollutant
- Non-combustible
- Bio-degradable
- Alcohol free

Benefits

A cozier environment

Our fragrances have a beneficial effect on stress, depression and will further enhance other positive factors like happiness, relaxation and stimulation.

Freshen your journey

Be surrounded with pleasant aroma as you drive while enjoying the aromatherapy benefits.

Use it anywhere

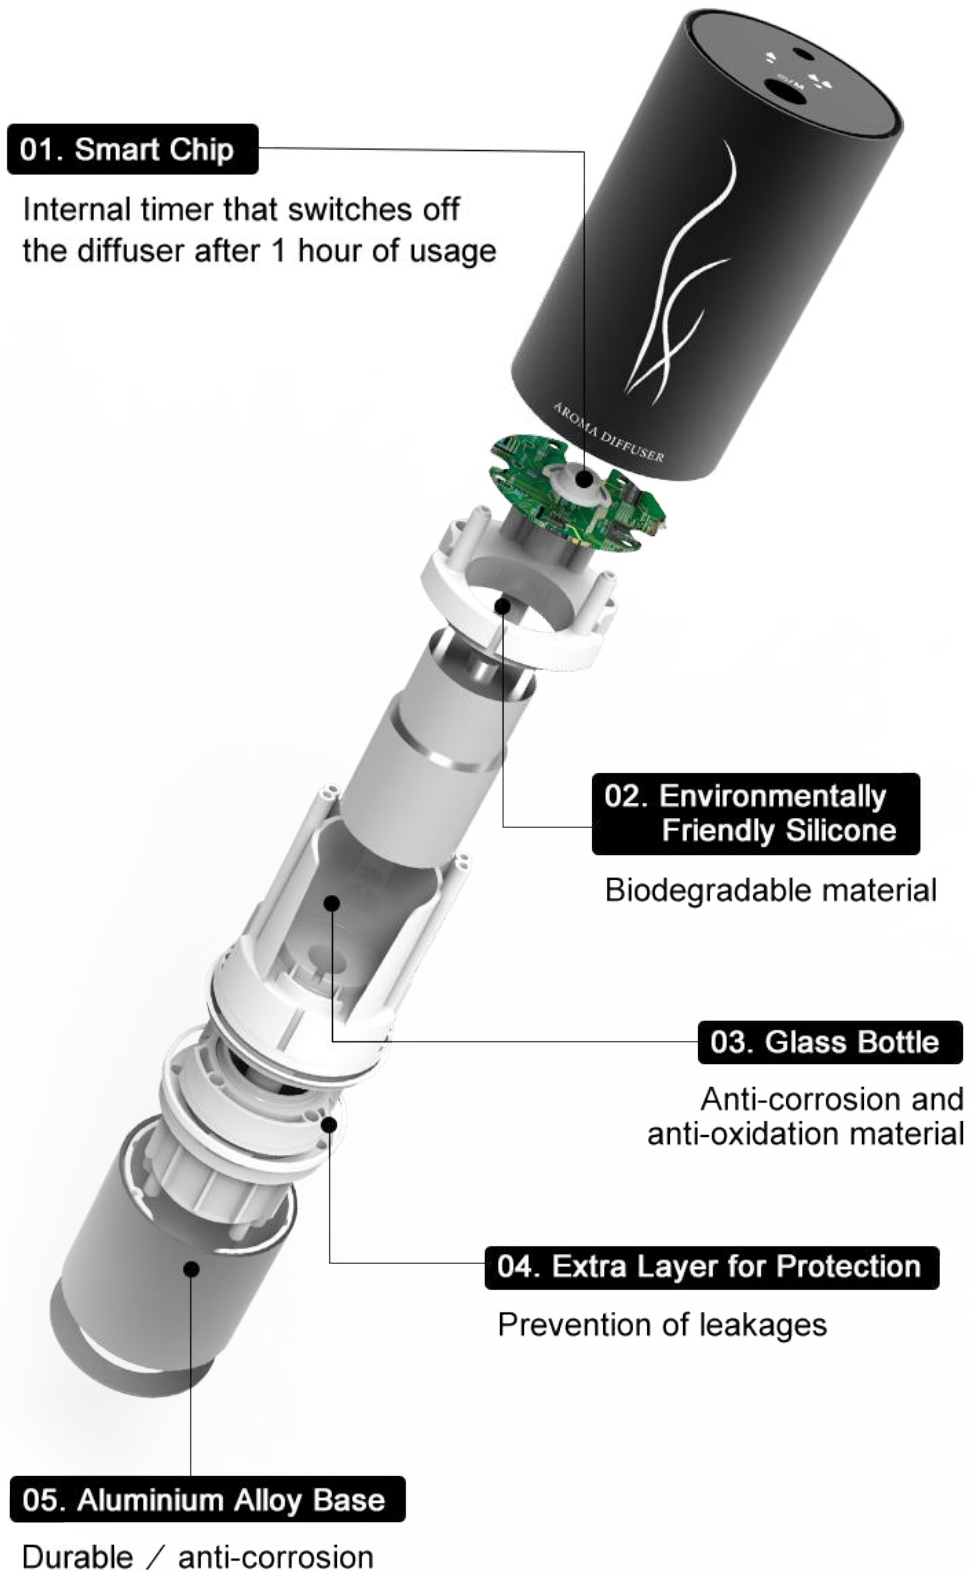

Enjoy the convenience of pleasant aroma by using our diffuser with power bank while enjoying aromatherapy benefits!

Structured Components

The components are made of 5 different parts that works together as a whole product.

{USB Aroma Diffuser}

Glass Bottle

The glass bottle(20ml) is made of the finest quality material.

Compared with conventional plastic materials, the glass is tough on corrosion, oxidation and hard to deteriorate.

Directions

Step 1

Rotate the top cover counterclockwise to remove the base cover.

Step 2

Unscrew the glass bottle.

Step 3

Pour Aromatherapy Oil into the bottle and screw the bottle back.

Step 4

Ensure the base is securely fasten by rotating clockwise.

{USB Aroma Diffuser}

Operation Modes

Our diffuser consists of 2 modes:

MODE 01 (M1) - Continuous Spray

MODE 02 (M2) - Intermittent Spray

(5 seconds spray / pause interval)

Changing of modes

Mode 01 - Press the /M button once

{ Aroma Nebulizer }

“ *Positively affecting and influencing our well-being by moisturizing a around* ”

Discover an exciting tr
ambience enhancement & brand marketing!

AROMATHERAPY

Health and wellbeing through fragrance

The new modern way of diffusing aroma throughout offices, shops, lobbies, clinics, restaurants, fitness centres, commercial buildings and even homes. Our Aroma Concentrates which are specially formulated for use in Aroma Nebulizer can positively affect & influence our well-being by moisturizing and scenting the air around us.

Discover an exciting trend of air scenting, ambience enhancement & brand marketing!

Studies have shown that humans greatly prefer spaces that smell good. The atmosphere in just about any interior space, of any size, can be enhanced with a subtle, expertly created scent and fresher air to breathe.

Every aspect of a physical facility should be designed to ensure people have a memorable and positive experience while inside. Sense of smell is the only sense which directly linked to the Limbic System, the part of the human brain where emotions are created and memories are stored. And therefore, aroma creates and reinforces an emotional connection that visitors will recall and be influenced.

The use of aroma extends to the brand image is a powerful tool for sophisticated marketers, deepening and extending the brand position. Our clients have found that aroma becomes the most powerful and memorable part of the customer experience with their brands. Aroma and refreshing air can help people to positively recall a brand or a place, and it can be used to communicate brand values.

NB-328 Aroma Nebulizer

Aroma Nebulizer / Ambience Scenting / Air Aroma Diffusing / Air Fragrancing Device

There are plenty of names for it but it is quite simply a diffusing equipment which produces a fine spray of Aroma concentrate into the air which is programmable and allows you to set the working durations (time and day) according to your preference. It also allows you to decide on the level of aroma intensity.

- Voltage/Power: DC12V/4W
- Dimension: (L) 18.8cm x (W) 6.8cm x (H) 21.3cm
- Coverage: 1000sqft
- Oil Consumption: 1ml/hr±5%
- Weight: 500g (Stand alone or can easily mounted onto the wall)
- PET plastic bottle capacity: 200ml
- Adjustable days of operations

USAGE GUIDES

- 1** Add our Aroma Concentrate (extra strong) into the PET Plastic Bottle
- 2** Screw on the PET Plastic Bottle (by turning anti-clockwise vertically) onto the nebulizer
- 3** Connect the power
- 4** Synchronize nebulizer time to the current local time in 24-hour format. Set desired timing on and off.

{ Massage Oil Blends }

“*Aromatherapy massage is sensual a approach to heal our body and mind. It soothes away stress and strains of our lives.*”

When you are happy, your body's immune defenses are strengthened. On the other hand, if you are unhappy or sad, you are more susceptible to illnesses. This is the power of emotion.

Aromatherapy massage helps a person to relax and regain physical and emotional balances. Essential oils should not be applied to the skin undiluted with base oils.

This is why it is important for us to formulate specifically ready use type of massage oils with essential oil properties for use on skin. The skin, being semi-permeable can absorb the massage oils with particles of essential oil to achieve the therapeutic effects physically, emotionally and psychologically.

Directions

- 1** Pour small amount of massage oil on palm of your hands.
- 2** Rub your palms together and apply to body or feet for a relax and soothing massage.
- 3** It is non-drying and gentle on skin.

Precautions

- Keep out of reach of children.
- Avoid contact with eyes.

{ Aromatherapy Oil }

“ *Health and wellbeing
through fragrance.* ”

Our Aromatherapy oils are specially formulated for use in Aroma vapourizer / Electric diffuser / Aromatic lamp diffuser / Car scenter / Candle burner & other Aroma diffusing devices that can positively affect & influence our well-being by scenting the air around us.

{Aromatherapy Oil}

Aromatherapy

Aromatherapy can have a beneficial effect on irritation, stress, depression, apathy and can further enhance positive factors like happiness, sensuality, relaxation, and stimulation.

Most of us are pretty much aware that scents can change the way we feel. Increasingly, there is a growing appreciation of the truly remarkable ability of fragrances to respond to our specific mental, physical and spiritual needs.

Our sense of smell is registered in one of the oldest parts of the brain, known as the limbic area. This area is connected with memory, emotion, and instinctive activities, such as sexual response, sleep, hunger, and thirst. When we breathe in a scent, the aromatic molecules are quickly inhaled via the millions of sensitive cells that line the nasal passages, triggering messages that pass directly to the brain. This causes chemical changes in the body, which affect the state of mind, health, and spiritual aspects of the person.

Aromatherapy Oil Usages

Our Aromatherapy oils are specially formulated for use in Aroma vapourizer / Electric diffuser / Aromatic lamp diffuser / Car scenter / Candle burner & other Aroma diffusing devices that can positively affect & influence our well-being by scenting the air around us.

These Aromatherapy oils are made in Singapore with premium-grade and finest ingredients imported from Europe, the USA, Australia, and from sustainable & reliable sources all over the world in compliance with IFRA standards.

These oils excel in the production of both scented candles and wax melts, alongside a diverse array of personal care products, such as handmade soaps, hair conditioners, shampoos, shower gels, bar soaps, and hand sanitizers. Additionally, it is also used in crafting fine fragrances, perfumes, body and linen sprays, and is ideal for blending with carrier oils to create massage oils. Its versatility and superior quality render it essential in both professional and home-made creations.

We have the widest range of scents for individual preference which allows you to choose the fragrance that you like and how you want to "feel" when you smell them. Use the invigorating, stimulating, or refreshing scents (Fruity and leafy) when you are feeling tired or low spirited. Try out the calming fragrances (Flowers) to ease away your worries, and select the rich and luxurious aromas (Special blends) when you want some pampering.

Precautions

- Keep away from children.
- For external use only. Do not ingest.
- Keep away from flame. Store in a cool, dry place.
- Avoid direct contact with eyes and all sensitive areas.
- If pregnant or lactating, consult your healthcare practitioner before using.
- Natural essential oils are highly concentrated and should be used with care.
- If applying an essential oil to your skin, always perform a small patch test to an insensitive part of the body after you have properly diluted the oil in an appropriate carrier oil.

Please keep in mind that all content is provided for informational purposes and are not implied or intended to constitute professional medical advice or treatment.

The above information is not intended to diagnose, treat, cure or prevent any disease.

{ 100% Pure Essential Oils }

Essential oils have become a popular means of aromatherapy and its practices has an effect on our health and well-being.

One may use it to aid physical and emotional problems and are meant to provide relief to certain symptoms.

You may apply them directly onto the skin by diluting with a carrier oil or using our aromatherapy hardware to aid in dispersing the fragrance to your area.

Our 100% Pure Essential oils are free from synthetic chemicals or additives and the oils are extracted in its purest form.

Country of Origin - Italy/ India

Ingredients - 100% pure bergamot essential oil

Sizes available - 10ml, 100ml, 1 Litre, 2 Litres, 5 Litres, 10 Litres, 25 Litres

Attributes

This refreshing smelling essential oil is popular in aromatherapy and is ideal for creating a relaxed and happy feeling, relieving urinary tract infections, boosting the liver, spleen and stomach. While it is used in fighting oily skin, acne, psoriasis, eczema, as well as cold sores, this oil contains bergaptene and should avoid exposure to sunlight or sunbeds for at least 12-18 hours after usage.

Therapeutic properties

Refreshing, immune supporting, antiseptic and digestive. Useful in skincare and perfumery. Uplifting, anti-depressant, self-empowering, supports confidence, aids in self-expression.

Suggested Aromatherapy Usages

- ✓ For car scenter / diffuser use, drip oil onto the oil pad.
- ✓ For use on pillow, add a few drops of essential oils onto a couple of cotton balls and tuck them in both sides of your pillow just underneath the pillow case.
- ✓ For use in candle burner / electric vapourizer / aromatic lamp diffuser, add 6 -10 drops or more if desired into the recessed bowl containing warm water.
- ✓ For bath or foot bath, add a few drops of essential oils into bath tub or bucket containing warm water.
- ✓ For inhalation, add a few drops to a cotton ball, soft tissue, diffuser or small pot of hot water. Cover your head with a large towel, close your eyes, put your face above the water and inhale deeply. Repeat as required.
- ✓ For all other uses, carefully dilute with a carrier oil such as jojoba, almond or coconut oil prior to use. Please consult an essential oil book or other professional reference source for suggested dilution ratios.

Cautions:

- For external use only.
- Keep out of reach of children.
- Keep away from flame. Store in a cool, dry place.
- Avoid direct contact with eyes and all sensitive areas.
- If pregnant or lactating, consult your healthcare practitioner before using.
- Natural essential oils are highly concentrated and should be used with care.
- **This oil is considered photo toxic. Avoid direct sun exposure after application. Avoid during pregnancy.**

Warnings:

- **As with all essential oils, never use them undiluted, in eyes or mucous membranes. Do not take internally unless working with a qualified and expert practitioner. If applying an essential oil to your skin, always perform a small patch test to an insensitive part of the body after you have properly diluted the oil in an appropriate carrier.**
- **Please keep in mind that all content is provided for informational purposes and is not implied or intended to constitute professional medical advice or treatment.**

100% Pure Clove Bud Essential Oil (*Syzygium aromaticum*)

Botanical Name - *Syzygium aromaticum* (also known as *Eugenia caryophyllata*)

Aroma - Sweet and spicy with a fresh top note

Note classification - Top

Extraction - Steam distillation

Part of Plant – Buds

Country of Origin – Indonesia/ India

Ingredients - 100% pure clove bud essential oil

Sizes available - 10ml, 100ml, 1 Litre, 2 Litres, 5 Litres, 10 Litres, 25 Litres

Attributes

Clove essential oil has been known to be a great antiseptic and has traditionally been used for easing toothaches and to relieve symptoms of cold and flus.

Clove oil can also be used for acne, bruises, burns and cuts, keeping infection at bay and as a pain reliever. It helps with toothache, mouth sores, rheumatism and arthritis. Its antiseptic and pain relieving properties are attributed to its eugenol, eugenyl acetate, b caryophyllene and a humulene content. These components are found in all cuts of Clove oil but are most balanced in the Bud.

It is beneficial to the digestive system, effective against vomiting, diarrhoea, flatulence, spasms and parasites, as well as bad breath. Clove oil is valuable for relieving respiratory problems, like bronchitis, asthma and tuberculosis. The disinfecting property is useful in cases of infectious diseases.

Adding a few drops of clove oil on a cotton ball and placing the cotton ball in clothes cabinet will not only fragrance the cupboard, but also deter fish moths and other insects.

Therapeutic properties

Clove oil are analgesic, antiseptic, antispasmodic, anti-neuralgic, carminative, anti-infectious, disinfectant, insecticide, stimulant, stomachic, uterine and tonic.

Suggested Aromatherapy Usages

- ✓ For car scenter / diffuser use, drip oil onto the oil pad.
- ✓ For use on pillow, add a few drops of essential oils onto a couple of cotton balls and tuck them in both sides of your pillow just underneath the pillow case.
- ✓ For use in candle burner / electric vapourizer / aromatic lamp diffuser, add 6 -10 drops or more if desired into the recessed bowl containing warm water.
- ✓ For bath or foot bath, add a few drops of essential oils into bath tub or bucket containing warm water.
- ✓ For inhalation, add a few drops to a cotton ball, soft tissue, diffuser or small pot of hot water. Cover your head with a large towel, close your eyes, put your face above the water and inhale deeply. Repeat as required.
- ✓ For all other uses, carefully dilute with a carrier oil such as jojoba, almond or coconut oil prior to use. Please consult an essential oil book or other professional reference source for suggested dilution ratios.

Cautions:

- For external use only.
- Keep out of reach of children.
- Keep away from flame. Store in a cool, dry place.
- Avoid direct contact with eyes and all sensitive areas.
- Possible dermal sensitiser and irritant. Avoid during pregnancy.
- If pregnant or lactating, consult your healthcare practitioner before using.
- Natural essential oils are highly concentrated and should be used with care.

Warnings:

- As with all essential oils, never use them undiluted, in eyes or mucous membranes. Do not take internally unless working with a qualified and expert practitioner. 100% Pure Frankincense Essential Oil (*Boswellia serrata*)

Botanical Name - *Boswellia serrata*

Aroma - Fresh and terpene-like scent with a subtle green-lemon note

Note classification - Base

Extraction - Steam distillation

Part of Plant - Resin

Country of Origin – India/ Iran

Ingredients - 100% pure frankincense essential oil

Sizes available - 10ml, 100ml, 1 Litre, 2 Litres, 5 Litres, 10 Litres, 25 Litres

Attributes

Excellent for dry and mature skins due to its anti-inflammatory properties. Can also be used on oily skins in small quantities due to its natural astringency and after sun exposure. Frankincense oil is said to help rejuvenate an ageing skin, is a skin tonic and is effective with sores, wounds, scars and skin inflammation.

On the respiratory tract, it clears the lungs and helps with shortness of breath, asthma, bronchitis, laryngitis, coughs and colds.

It can be useful to ease heavy periods, is a general tonic to the uterus and has a calming effect during labour. It is also most helpful for rheumatism and has a positive impact on the urinary tract.

Therapeutic properties

Antiseptic, astringent, carminative, cicatrisant, cytophylactic, digestive, diuretic, emmenagogue, expectorant, sedative, tonic, uterine, vulnerary and expectorant.

Suggested Aromatherapy Usages

- ✓ For car scenter / diffuser use, drip oil onto the oil pad.
- ✓ For use on pillow, add a few drops of essential oils onto a couple of cotton balls and tuck them in both sides of your pillow just underneath the pillow case.
- ✓ For use in candle burner / electric vapourizer / aromatic lamp diffuser, add 6 -10 drops or more if desired into the recessed bowl containing warm water.
- ✓ For bath or foot bath, add a few drops of essential oils into bath tub or bucket containing warm water.
- ✓ For inhalation, add a few drops to a cotton ball, soft tissue, diffuser or small pot of hot water. Cover your head with a large towel, close your eyes, put your face above the water and inhale deeply. Repeat as required.
- ✓ For all other uses, carefully dilute with a carrier oil such as jojoba, almond or coconut oil prior to use. Please consult an essential oil book or other professional reference source for suggested dilution ratios.

Cautions:

- For external use only.
- Keep out of reach of children.
- Keep away from flame. Store in a cool, dry place.
- Avoid direct contact with eyes and all sensitive areas.
- If pregnant or lactating, consult your healthcare practitioner before using.
- Natural essential oils are highly concentrated and should be used with care.
- **Frankincense oil is non-toxic and non-irritant and can be used by most people.**

Warnings:

- **As with all essential oils, never use them undiluted, in eyes or mucous membranes. Do not take internally unless working with a qualified and expert practitioner. If applying an essential oil to your skin, always perform a small patch test to an insensitive part of the body after you have properly diluted the oil in an appropriate carrier.**

100% Pure Grapefruit Essential Oil (Citrus paradisi)

Botanical Name - Citrus paradisi

Aroma - Fresh sweet citrus smell

Note classification - Top

Extraction - Cold pressed

Part of Plant – Fresh peel

Country of Origin - Italy/ Australia

Ingredients - 100% pure grapefruit essential oil

Sizes available - 10ml, 100ml, 1 Litre, 2 Litres, 5 Litres, 10 Litres, 25 Litres

Attributes

Grapefruit essential oil is refreshing and balancing in skin care, especially useful for oily skin types. It helps to clear congested oily skin and also assists with acne, while toning the skin and tissues.

It relieves and calms tension and helps uplift the mood and alleviate depression. It is used to combat muscle fatigue and stiffness while stimulating the lymphatic system and thereby clearing the body of toxins. Grapefruit is used in hair care to promote hair growth.

It has a high vitamin C content and is therefore valuable to the immune system and useful for colds and sinus conditions. It has a positive effect on obesity and also has diuretic properties, helping to remove excess water from the body and is therefore also great for treating cellulite.

Therapeutic properties

Antidepressant, antiseptic, aperitif, diuretic, disinfectant, lymphatic stimulant, tonic and anti-infectious.

Suggested Aromatherapy Usages

- ✓ For car scenter / diffuser use, drip oil onto the oil pad.
- ✓ For use on pillow, add a few drops of essential oils onto a couple of cotton balls and tuck them in both sides of your pillow just underneath the pillow case.
- ✓ For use in candle burner / electric vapourizer / aromatic lamp diffuser, add 6 -10 drops or more if desired into the recessed bowl containing warm water.
- ✓ For bath or foot bath, add a few drops of essential oils into bath tub or bucket containing warm water.
- ✓ For inhalation, add a few drops to a cotton ball, soft tissue, diffuser or small pot of hot water. Cover your head with a large towel, close your eyes, put your face above the water and inhale deeply. Repeat as required.
- ✓ For all other uses, carefully dilute with a carrier oil such as jojoba, almond or coconut oil prior to use. Please consult an essential oil book or other professional reference source for suggested dilution ratios.

Cautions:

- For external use only.
- Keep out of reach of children.
- Keep away from flame. Store in a cool, dry place.
- Avoid direct contact with eyes and all sensitive areas.
- If pregnant or lactating, consult your healthcare practitioner before using.
- Natural essential oils are highly concentrated and should be used with care.
- Non-toxic, non-irritant, non-sensitizing and although listed as non-phototoxic, it can irritate the skin if exposed to strong sunlight after treatment.

Warnings:

- **As with all essential oils, never use them undiluted, in eyes or mucous membranes. Do not take internally unless working with a qualified and expert practitioner. If applying an essential oil to your skin, always perform a small patch test to an insensitive part of the body after you have properly diluted the oil in an appropriate carrier.**

100% Pure Lavender Essential Oil (*Lavandula angustifolia*)

Botanical Name - *Lavandula angustifolia*

Aroma - Refreshing and floral

Note classification - Middle

Extraction - Steam distillation

Part of Plant - Flowering tops

Country of Origin - France/ India

Ingredients - 100% pure lavender essential oil

Sizes available - 10ml, 100ml, 1 Litre, 2 Litres, 5 Litres, 10 Litres, 25 Litres

History

It was Rene-Maurice Gattefosse who observed the healing effects of lavender oil when he burnt his hand in a laboratory accident, and it is still used today for burns including in hospitals, for its pain relieving, antiseptic & skin healing properties.

Attributes

Lavender oil is a very popular oil known for its relaxing and soothing effect on the nerves, calming depression, hysteria, relieving tension, panic and nervous exhaustion. It combats headaches, migraines and insomnia. It is helpful for asthma, laryngitis, bronchitis, colds, whooping cough, throat infections and helps the digestive system deal with flatulence, vomiting, colic and nausea. It also relieves pain when used for arthritis, rheumatism, lumbago and muscular aches and pains. Lavender oil can also be used as an insect repellent.

Therapeutic properties

Antiseptic, analgesic, anti-convulsant, anti-depressant, anti-rheumatic, anti-spasmodic, anti-inflammatory, antiviral, bactericide, carminative, cholagogue, cicatrisant, cordial, cytophylactic, decongestant, deodorant, diuretic, emmenagogue, hypotensive, nervine, rubefacient, sedative, sudorific and vulnerary.

Suggested Aromatherapy Usages

- ✓ For car scenter / diffuser use, drip oil onto the oil pad.
- ✓ For use on pillow, add a few drops of essential oils onto a couple of cotton balls and tuck them in both sides of your pillow just underneath the pillow case.
- ✓ For use in candle burner / electric vapourizer / aromatic lamp diffuser, add 6 -10 drops or more if desired into the recessed bowl containing warm water.
- ✓ For bath or foot bath, add a few drops of essential oils into bath tub or bucket containing warm water.
- ✓ For inhalation, add a few drops to a cotton ball, soft tissue, diffuser or small pot of hot water. Cover your head with a large towel, close your eyes, put your face above the water and inhale deeply. Repeat as required.
- ✓ For all other uses, carefully dilute with a carrier oil such as jojoba, almond or coconut oil prior to use. Please consult an essential oil book or other professional reference source for suggested dilution ratios.

Cautions:

- For external use only.
- Keep out of reach of children.
- Keep away from flame. Store in a cool, dry place.
- Avoid direct contact with eyes and all sensitive areas.
- If pregnant or lactating, consult your healthcare practitioner before using.
- Natural essential oils are highly concentrated and should be used with care.

Warnings:

- **As with all essential oils, never use them undiluted, in eyes or mucous membranes. Do not take internally unless working with a qualified and expert practitioner. If applying an essential oil to your skin, always perform a small patch test to an insensitive part of the body after you have properly diluted the oil in an appropriate carrier.**

100% Pure Patchouli Essential Oil (Pogostemon cablin)

Botanical Name - Pogostemon cablin

Aroma - Musky, earthy, strong spicy and herbaceous

Note classification - Base

Extraction - Steam distillation

Part of Plant - Leaves

Country of Origin - Indonesia/ India

Ingredients - 100% pure patchouli essential oil

Sizes available - 10ml, 100ml, 1 Litre, 2 Litres, 5 Litres, 10 Litres, 25 Litres

Attributes

Patchouli oil has been known to be soothing to the nervous system and has traditionally been used to relieve symptoms of depression and stress. It is effective for fungal and bacterial infection and is of great help for insect bites. It could also be used as an insect repellent and is also used as a support for dealing with any substance addiction. Its diuretic properties is effective in fighting water retention and to break up cellulite, easing constipation and helping to reduce overweight.

In addition, it has a great deodorizing action, while cooling down inflammations and assisting with wound healing. For the skin, this oil is one of the most active and is a superb tissue regenerator, helping to stimulate the growth of new skin cells. In wound healing, it not only promotes faster healing, but also helps to prevent ugly scarring when the wound heals. This is why it is used to treat eczema, sores, acne, ulcers, any fungal infections, as well as scalp disorders.

Therapeutic properties

Antidepressant, antiphlogistic, antiseptic, aphrodisiac, astringent, cicatrisant, cytophylactic, deodorant, diuretic, febrifuge, fungicide, insecticide, sedative and tonic.

100% Pure Tea Tree Essential Oil (*Melaleuca alternifolia*)

Botanical Name - *Melaleuca alternifolia*

Aroma - Fresh, warm and spicy-camphoraceous

Note classification - Middle

Extraction - Steam distillation

Part of Plant - Leaves and twigs

Country of Origin - Australia/ India

Ingredients - 100% pure tea tree essential oil

Sizes available - 10ml, 100ml, 1 Litre, 2 Litres, 5 Litres, 10 Litres, 25 Litres

Attributes

Tea tree oil is particularly useful as an antiseptic and disinfectant to fight off any infections, and effective against bacteria, fungi and viruses such as influenza, cold sores, catarrh, glandular fever and gingivitis. Besides the antiseptic properties of tea tree oil, it helps clear bronchial congestion, coughs, tuberculosis, asthma and sinusitis.

On the skin, it clears abscesses, acne, burns, herpes, oily skin, athlete's foot, cold sores, blemishes, diaper rash, warts, sunburn and infected wounds, while fighting dandruff on the scalp.

A massage using tea tree oil diluted in a carrier before an operation may help to fortify the body and reduce post-operative shock.

Therapeutic properties

Antimicrobial, antiseptic, antiviral, balsamic, bactericide, cicatrisant, expectorant, fungicide, insecticide, stimulant and sudorific.

Suggested Aromatherapy Usages

- ✓ For car scenter / diffuser use, drip oil onto the oil pad.
- ✓ For use on pillow, add a few drops of essential oils onto a couple of cotton balls and tuck them in both sides of your pillow just underneath the pillow case.
- ✓ For use in candle burner / electric vapourizer / aromatic lamp diffuser, add 6 -10 drops or more if desired into the recessed bowl containing warm water.
- ✓ For bath or foot bath, add a few drops of essential oils into bath tub or bucket containing warm water.
- ✓ For inhalation, add a few drops to a cotton ball, soft tissue, diffuser or small pot of hot water. Cover your head with a large towel, close your eyes, put your face above the water and inhale deeply. Repeat as required.
- ✓ For all other uses, carefully dilute with a carrier oil such as jojoba, almond or coconut oil prior to use. Please consult an essential oil book or other professional reference source for suggested dilution ratios.

Cautions:

- For external use only.
- Keep out of reach of children.
- Keep away from flame. Store in a cool, dry place.
- Avoid direct contact with eyes and all sensitive areas.
- If pregnant or lactating, consult your healthcare practitioner before using.
- Natural essential oils are highly concentrated and should be used with care.
- Tea tree oil is considered a safe oil, as it is non-toxic and non-irritant. May cause skin sensitization to some individuals and it should be used with this in mind.

Warnings:

- As with all essential oils, never use them undiluted, in eyes or mucous membranes. Do not take internally unless working with a qualified and expert practitioner. If applying an essential oil to your skin, always perform a small patch test to an insensitive part of the body after you have properly diluted the oil in an appropriate carrier.

100% Pure Ylang Ylang Essential Oil (Cananga odorata)

Botanical Name - Cananga odorata

Aroma - Sweet, exotic, floral aroma

Note classification - Middle

Extraction - Steam distillation

Part of Plant – Flowers

Country of Origin – Indonesia/ India/ Madagascar

Ingredients - 100% pure ylang ylang essential oil

Sizes available - 10ml, 100ml, 1 Litre, 2 Litres, 5 Litres, 10 Litres, 25 Litres

Attributes

Ylang-ylang oil has euphoric and sedative effects on the nervous system that helps with anxiety, fear, tension, and panic while the aphrodisiac qualities is useful for impotence (men) and frigidity (women).

It is also particularly useful with rapid breathing and heartbeat, it can also help with reducing high blood pressure and useful for intestinal infections.

On the skin, ylang-ylang oil has a soothing effect and its balancing action sorts out overly-dry or overly-oily skin by balancing the secretion of sebum, and has a stimulating effect on the scalp which promotes more luxuriant hair growth.

Therapeutic properties

The therapeutic properties of ylang-ylang oil are antidepressant, antiseborrheic, antiseptic, aphrodisiac, hypotensive, nervine and sedative.

Suggested Aromatherapy Usages

- ✓ For car scenter / diffuser use, drip oil onto the oil pad.
- ✓ For use on pillow, add a few drops of essential oils onto a couple of cotton balls and tuck them in both sides of your pillow just underneath the pillow case.
- ✓ For use in candle burner / electric vapourizer / aromatic lamp diffuser, add 6 -10 drops or more if desired into the recessed bowl containing warm water.
- ✓ For bath or foot bath, add a few drops of essential oils into bath tub or bucket containing warm water.
- ✓ For inhalation, add a few drops to a cotton ball, soft tissue, diffuser or small pot of hot water. Cover your head with a large towel, close your eyes, put your face above the water and inhale deeply. Repeat as required.
- ✓ For all other uses, carefully dilute with a carrier oil such as jojoba, almond or coconut oil prior to use. Please consult an essential oil book or other professional reference source for suggested dilution ratios.

Cautions:

- For external use only.
- Keep out of reach of children.
- Keep away from flame. Store in a cool, dry place.
- Avoid direct contact with eyes and all sensitive areas.
- If pregnant or lactating, consult your healthcare practitioner before using.
- Natural essential oils are highly concentrated and should be used with care.
- **Non-toxic, non-irritating and non-sensitising. Avoid with low blood pressure.**

Warnings:

- **As with all essential oils, never use them undiluted, in eyes or mucous membranes. Do not take internally unless working with a qualified and expert practitioner. If applying an essential oil to your skin, always perform a small patch test to an insensitive part of the body after you have properly diluted the oil in an appropriate carrier.**

Certified Organic Lavender Pure Essential Oil (*Lavandula angustifolia*)

Botanical Name - *Lavandula angustifolia*

Aroma - Refreshing and floral

Note classification - Middle

Extraction - Steam distillation

Part of Plant - Flowering tops

Country of Origin - Bulgaria

Ingredients - 100% pure & certified organic lavender essential oil

Sizes available - 10ml, 100ml, 1 Litre, 2 Litres, 5 Litres, 10 Litres, 25 Litres

History

It was Rene-Maurice Gattefosse who observed the healing effects of lavender oil when he burnt his hand in a laboratory accident, and it is still used today for burns including in hospitals, for its pain relieving, antiseptic & skin healing properties. "Lavandula" comes from the Latin word lavare, meaning "to wash" appropriate for deep cleansing in so many ways.

Attributes

Lavender oil is a very popular oil known for its relaxing and soothing effect on the nerves, calming depression, hysteria, relieving tension, panic and nervous exhaustion. It combats headaches, migraines and insomnia. It is helpful for asthma, laryngitis, bronchitis, colds, whooping cough, throat infections and helps the digestive system deal with flatulence, vomiting, colic and nausea. It also relieves pain when used for arthritis, rheumatism, lumbago and muscular aches and pains. Lavender oil can also be used as an insect repellent.

Therapeutic properties

Antiseptic, analgesic, anti-convulsant, anti-depressant, anti-rheumatic, anti-spasmodic, anti-inflammatory, antiviral, bactericide, carminative, cholagogue, cicatrisant, cordial, cytophylactic, decongestant, deodorant, diuretic, emmenagogue, hypotensive, nervine, rubefacient, sedative, sudorific and vulnerary.

Suggested Aromatherapy Usages

- ✓ For car scenter / diffuser use, drip oil onto the oil pad.
- ✓ For use on pillow, add a few drops of essential oils onto a couple of cotton balls and tuck them in both sides of your pillow just underneath the pillow case.
- ✓ For use in candle burner / electric vapourizer / aromatic lamp diffuser, add 6 -10 drops or more if desired into the recessed bowl containing warm water.
- ✓ For bath or foot bath, add a few drops of essential oils into bath tub or bucket containing warm water.
- ✓ For inhalation, add a few drops to a cotton ball, soft tissue, diffuser or small pot of hot water. Cover your head with a large towel, close your eyes, put your face above the water and inhale deeply. Repeat as required.
- ✓ For all other uses, carefully dilute with a carrier oil such as jojoba, almond or coconut oil prior to use. Please consult an essential oil book or other professional reference source for suggested dilution ratios.

Cautions:

- For external use only.
- Keep out of reach of children.
- **Keep away from flame. Store in a cool, dry place.**

Certified Organic Tea Tree Pure Essential Oil (*Melaleuca alternifolia*)

Botanical Name - *Melaleuca alternifolia*

Aroma - Fresh, warm and spicy-camphoraceous

Note classification - Middle

Extraction - Steam distillation

Part of Plant - Leaves and twigs

Country of Origin - Australia

Ingredients - 100% pure & certified organic tea tree essential oil

Sizes available - 10ml, 100ml, 1 Litre, 2 Litres, 5 Litres, 10 Litres, 25 Litres

Attributes

Tea tree oil is particularly useful as an antiseptic and disinfectant to fight off any infections, and effective against bacteria, fungi and viruses such as influenza, cold sores, catarrh, glandular fever and gingivitis. Besides the antiseptic properties of tea tree oil, it helps clear bronchial congestion, coughs, tuberculosis, asthma and sinusitis.

On the skin, it clears abscesses, acne, burns, herpes, oily skin, athlete's foot, cold sores, blemishes, diaper rash, warts, sunburn and infected wounds, while fighting dandruff on the scalp.

A massage using tea tree oil diluted in a carrier before an operation may help to fortify the body and reduce post-operative shock.

Therapeutic properties

Antimicrobial, antiseptic, antiviral, balsamic, bactericide, cicatrisant, expectorant, fungicide, insecticide, stimulant and sudorific.

Suggested Aromatherapy Usages

- ✓ For car scenter / diffuser use, drip oil onto the oil pad.
- ✓ For use on pillow, add a few drops of essential oils onto a couple of cotton balls and tuck them in both sides of your pillow just underneath the pillow case.
- ✓ For use in candle burner / electric vapourizer / aromatic lamp diffuser, add 6 -10 drops or more if desired into the recessed bowl containing warm water.
- ✓ For bath or foot bath, add a few drops of essential oils into bath tub or bucket containing warm water.
- ✓ For inhalation, add a few drops to a cotton ball, soft tissue, diffuser or small pot of hot water. Cover your head with a large towel, close your eyes, put your face above the water and inhale deeply. Repeat as required.
- ✓ For all other uses, carefully dilute with a carrier oil such as jojoba, almond or coconut oil prior to use. Please consult an essential oil book or other professional reference source for suggested dilution ratios.

Cautions:

- For external use only.
- Keep out of reach of children.
- Keep away from flame. Store in a cool, dry place.
- Avoid direct contact with eyes and all sensitive areas.
- If pregnant or lactating, consult your healthcare practitioner before using.
- Natural essential oils are highly concentrated and should be used with care.
- Tea tree oil is considered a safe oil, as it is non-toxic and non-irritant, but may cause skin sensitization to some individuals, and it should be used with this in mind.

Warnings:

- As with all essential oils, never use them undiluted, in eyes or mucous membranes. Do not take internally unless working with a qualified and expert practitioner. If applying an essential oil to your skin, always perform a small patch test to an insensitive part of the body after you have properly diluted the oil in an appropriate carrier.

{ Premium Grade Carrier Oils }

**Fractionated
Coconut Oil**

Jojoba Oil

Sweet Almond Oil

Premium Grade Carrier Oil - Fractionated Coconut (Cocos nucifera) / MCT

Botanical Name - Cocos nucifera

Aroma - Odourless

Method of Extraction - Fractionated

Country of Origin - Malaysia

Ingredients - Caprylic / Capric Triglyceride (Medium-Chain Triglyceride Oil)

Sizes Available - 120ml, 250ml, 1 Litre, 2 Litres, 5 Litres, 10 Litres, 25 Litres

Attributes

Fractionated Coconut oil / MCT oil can be used directly for massage. It is great for softening, nourishing the skin and locking in moisture and is known as one of nature's best remedies for treating dry, flaking skin leaving it to feel silky smooth. The oil contains a range of skin-friendly fatty acids and is prized for its light feel and gentle antimicrobial nature is reasonably light and fast absorbing.

It gives a lovely consistency in balms and creams for the face or body and is also great in hair care. Those with dry hair or split ends can massage it directly into the hair as conditioning treatment, leave for an hour or overnight if possible, then wash out.

About Medium-chain triglycerides (MCT)

Information

MCT oil is generally composed of the C8 and C10 medium-chain triglycerides.

Where does it come from?

MCT oil is colourless and odourless derived usually from coconut or palm kernel oil. Both have MCT in them.

Antimicrobial Properties

Lauric acid in MCT oil has antimicrobial, anti-fungal and anti-inflammatory properties and can effectively treat skin diseases.

Improves the skin, nails and hair

MCT oil works wonders on the skin by moisturizing it and reducing wrinkles and stretch marks. The oil also promotes healing and reduces skin peeling post sunburn.

MCT oil can be used as a lip balm, hair conditioner, and makeup remover. It moisturizes nail cuticles and prevents fungal infections in the nails.

Precautions

Do not ingest and keep out of reach of children.

Avoid eye contact. For external use only.

Premium Grade Carrier Oil - Jojoba (*Simmondsia chinensis*)

Botanical Name - *Simmondsia chinensis*

Aroma - Mild, almost odourless

Method of Extraction - Cold pressed, refined

Country of Origin - Israel

Ingredients - Pure Jojoba Oil

Sizes available - 120ml, 250ml, 1 Litre, 2 Litres, 5 Litres, 10 Litres, 25 Litres

Attributes

Jojoba oil (pronounced ho-ho-ba) is a lovely massage and skincare oil that is actually a liquid plant wax. Jojoba is very close to the skin's own natural sebum, making it very well absorbed. It is rich in nutrients such as Vitamins B and E, antioxidants and essential fatty acids that work together to help repair damaged skin cells, fight premature ageing and provide long lasting moisture and hydration for the skin.

It penetrates the skin rapidly leaving a soft non-sticky feel. It is especially protective and is therefore useful for anyone who works outdoors or is exposed to pollution. It is also nice as an ingredient of baby care products and is a lovely addition to cleansers, due to its natural emulsifying properties.

Jojoba oil is wonderful to use as a conditioner as it nourishes and protects dry and treated hair, but washes out well and does not leave the hair greasy or lank.

Precautions

Do not ingest and keep out of reach of children.

Avoid eye contact. For external use only.

Premium Grade Carrier Oil - Sweet Almond (*Prunus amygdalus dulcis*)

Botanical Name - *Prunus amygdalus dulcis*

Aroma - Delicate, sweet and slightly nutty

Method of Extraction - Cold pressed, refined

Country of Origin - Spain

Ingredients - Pure Almond Oil

Sizes available - 120ml, 250ml, 1 Litre, 2 Litres, 5 Litres, 10 Litres, 25 Litres

Attributes

Sweet Almond oil is excellent for massage. It is an excellent emollient (softening and soothing to the skin) and also helps the skin to balance its loss and absorption of moisture. Rich in vitamins and essential fatty acids, Sweet Almond oil also makes a nutritious moisturiser for all skin types, and makes a wonderful make-up remover.

Sweet Almond oil also contains Vitamins A, B1, B2, B6 with small amounts of Vitamins E and D. Due to the presence of Vitamin E, the oil has antioxidant capability. Antioxidants protect vital cell structures by neutralizing free radicals.

Topical Vitamin E has shown to have a wide variety of skin benefits. Many studies have shown that it can help decrease the effects of psoriasis, erythema, and may help in reducing the risk of skin cancer. Vitamin E also helps in the reduction of scarring from wounds and on the appearance of stretch marks on the skin.

It has a light to medium consistency which does not leave the skin feeling oily or sticky, making it ideal as an all-purpose base oil. Suitable for all skin types, Sweet Almond oil is light and easily absorbed into the skin, making it fantastic for soothing dry, chapped and irritated skin.

Precautions

Individuals with nut allergies should avoid using this oil.

Do not ingest and keep out of reach of children.

Avoid eye contact. For external use only.

Premium Grade Carrier Oil - Argan (Argania spinosa L.)

Botanical Name - Argania spinosa L.

Aroma - Characteristic

Method of Extraction - Cold pressed, refined

Country of Origin - Morocco

Ingredients - Pure Argan Oil

Sizes available - 1 Litre, 2 Litres, 5 Litres, 10 Litres, 25 Litres

Attributes

Argan oil contains several beneficial lipids and fatty acids for skin like Oleic, Linoleic and also Tocopherol. It is rich in nutrients such as Linoleic (Omega 6) which has a structural effect on membrane fluidity and contributes to the barrier function of the epidermis.

Essential fatty acids found in Argan oil play a very important biological role in preventing early aging and the loss of skin elasticity by helping to delay wrinkling and making the skin more supple and toned. Other important components of Argan oil are Tocopherols, including Vitamin E (tocopherol), as they aid in delaying cellular aging by its action on the reduction of the membrane susceptibility against oxidation. Triterpene alcohols identified in Argan oil noted to have anti-inflammatory properties; and therefore it can also be used directly as massage oil with excellent results. It stimulates not only the balance but also the regeneration and healing of the skin, hair and nails. Therefore, it shows excellent skin protective effects, softening and anti-drying properties.

As such, Argan oil can be said to have moisturizing and restructuring effects due to the high content and special composition of the unsaturated fatty acids and its unique natural content of physiological active minor components described above. As the benefits outweigh the downsides, it may be easily incorporated as an active ingredient into the range of products for dehydrated, dry and aging skin, or as an excellent carrier for skin and hair care products.

Precautions

Do not ingest and keep out of reach of children.
Avoid eye contact. For external use only.

Premium Grade Carrier Oil - Avocado (*Persea gratissima*)

Botanical Name - *Persea gratissima*

Aroma - Sweet, fatty and nutty

Method of Extraction - Cold pressed, refined

Country of Origin - Mexico

Ingredients - Pure Avocado Oil

Sizes available - 1 Litre, 2 Litres, 5 Litres, 10 Litres, 25 Litres

Attributes

Avocado oil is a highly therapeutic oil which is rich in Vitamins A, B1, B2, D and E, lecithin, pantothenic acid, and essential fatty acids. It exhibits higher stability over time compared to other oils due its low content of poly-unsaturated fatty acids.

Avocado oil may be directly applied to the skin and hair and may be easily incorporated as an active ingredient or an excellent carrier in skin care products. It is highly recommended for those with sensitive skin, problem skin and other irritations that require a vitamin rich oil. With its high nourishing properties, it penetrates deeply and retains moisture for a long time.

Avocado oil also restores dry, dehydrated, and mature skin. It is a rich, heavy oil that is best blended with other oils. Skin problems, especially eczema and psoriasis, respond to its high content of Vitamins A and E. It can also be used directly as massage oil.

Precautions

Do not ingest and keep out of reach of children.

Avoid eye contact. For external use only.

Premium Grade Carrier Oil - Grapeseed (*Vitis vinifera*)

Botanical Name - *Vitis vinifera*

Aroma - Mild, almost odourless

Method of Extraction - Cold pressed, refined

Country of Origin - Spain

Ingredients - Pure Grapeseed Oil

Sizes available - 1 Litre, 2 Litres, 5 Litres, 10 Litres, 25 Litres

Attributes

Grapeseed oil provides high linoleic acid (Omega 6) content with nourishing properties and quick penetration into the skin. It is known to be effective in repairing sensitive skin around the eyes and in reducing the appearance of stretch marks. As this oil is suitable for all skin types and will not aggravate acne due to its mild astringent properties, can also be used directly as a massage oil or as a carrier oil for essential oils in aromatherapy.

The Natural Tocopherol is a powerful antioxidant that provides protection. The oil is also light and thin with a minimal colour level and it is virtually odourless. As such, it may be applied directly to skin and may also be easily incorporated as an active ingredient or an ideal carrier in skin care products.

Precautions

Do not ingest and keep out of reach of children.

Avoid eye contact. For external use only.

Premium Grade Carrier Oil - Olive (*Olea europaea* L.)

Botanical Name - *Olea europaea* L.

Aroma - Medium, rich, typical

Method of Extraction - Cold pressed, refined

Country of Origin - Spain

Ingredients - Pure Olive Oil

Sizes available - 1 Litre, 2 Litres, 5 Litres, 10 Litres, 25 Litres

Attributes

Olive oil is a natural vegetable oil obtained from the pressed fruit of the olive tree, which is mainly cultivated in Mediterranean countries, such as Spain, Italy and Greece. It contains lots of natural fatty acids, Vitamins A and E, minerals and antioxidants (polyphenols and phytosterols).

Olive oil possesses excellent emollient properties and is a very popular oil used in cosmetics and personal care products, in particular, face wash and soaps products. It is also commonly used in anti-aging skin care products. Refined Olive oil is well suited to cosmetic products as the colour and aroma is lighter.

Several of the benefits of this oil include its ability to make the skin supple, its anti-inflammatory properties, and its healing properties. It can be used to treat psoriasis and eczema symptoms due to its thick consistency. Applying it on the skin may help protect it from external irritation and help it to recover from the damage caused by irritating agents. It also helps soften and hydrates cracked heels and reduces stretch marks. Using Olive oil on your hair and scalp can be beneficial and has been used since ancient times. To achieve best results, warm the oil gently and apply generously to your hair ends and scalp. Leave in for 10-20 minutes, then thoroughly shampoo your hair.

Precautions

Do not ingest and keep out of reach of children.
Avoid eye contact. For external use only.

Premium Grade Carrier Oil - Rosehip (Rosa mosqueta)

Botanical Name - Rosa mosqueta

Aroma - Mild and slightly earthy

Method of Extraction - Cold pressed, refined

Country of Origin - Chile

Ingredients - Pure Rosehip Oil

Size available - 23 Kgs

Attributes

Rosehip oil is extracted from Rosa aff. rubiginosa, a delicate rose which grows wild on the high mountains in Chile, and which is known locally as Rosa mosqueta.

It is a very popular, refined, all-purpose carrier oil used by manufacturers (particularly as a conditioning agent in hair care products), aromatherapists and massage therapists.

Rosehip oil is rich in essential fatty acids, namely 13.5 – 19.0% oleic acid (an omega-9 fatty acid), 39.0 – 55% linoleic acid (an omega-6 essential fatty acid), and 20.0 – 35% alpha-linolenic acid (an omega-3 essential fatty acid). Rosehip oil also contains natural Tretinoin or Retinoic Acid (a Vitamin A derivative), which replenishes and helps rebuild skin tissue.

The unique properties of Rosehip oil were discovered through scientific studies conducted at the Universities of Concepcion (Chile) and Missouri (USA). These studies showed that application of the oil effectively helped in attenuating scars, wrinkles and stretch marks; in preventing premature ageing and in regaining natural colour and tone.

Rosehip oil is expensive and is usually blended in a small (often 10%) dilution with other carrier oils. Despite the oil being a natural source of the antioxidant Vitamin C (a water-soluble vitamin) and Vitamin E (fat-soluble), the oil itself goes rancid rather quickly. This is the reason we do not downsize into smaller bottles and only supply in big drum size of 23 kgs.

Rosehip oil offers ease of spreading, great penetration and significant moisture retention. It is very effective in halting and even reversing the effects of solar radiation on the skin. In general, it is useful in all kinds of cell regeneration face treatments, pore reduction and acne treatments. The oil may be applied directly to the skin and hair. It may also be easily incorporated as an active ingredient or an ideal carrier in skin and hair care products. It is ideally suited for anti-wrinkle and sun care products. The recommended dosage is between 3 and 10%.

Precautions

Do not ingest and keep out of reach of children.
Avoid eye contact. For external use only.

{ ULV Cold Fogger /
Nano Mist Sprayer / Atomizer }

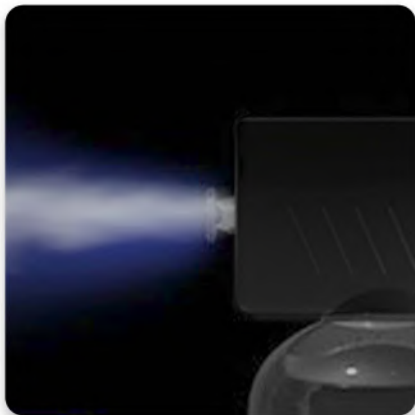

Produces fine mist containing the disinfectant solution that is dispersed into the air and contact surfaces. When used with our Pure™ Antimicrobial Concentrate Alcohol-free Hospital-grade Disinfectant, it eliminates 99.9% of bacteria and viruses as it contacts the harmful microorganisms.

Nano Mist Sprayer / Atomizer

1. Nano Atomization

Model M2
Spray Distance: Up to 2m

Blue Directional
Guide Light

Model K5
Spray Distance: Up to 1.5m

Nano Atomization technology used in our Nano Sprayer utilizes a high pressure air pump to produce fine mist.

2. Adjustable Modes

Switch modes easily at your fingertips

Model M2
comes with 2 Modes

Mode 01
Low Mist

Mode 02
High Mist

Modes available

Model K5
comes with 3 Modes

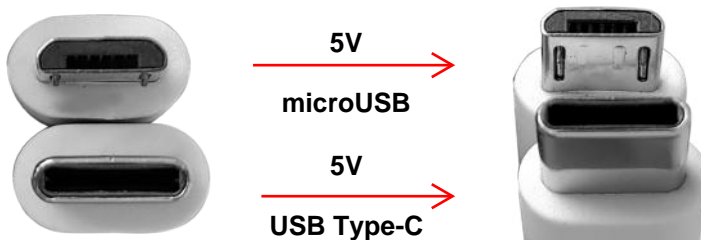

Mode 01
Low Mist

Mode 02
Med Mist

Mode 03
High Mist

3. USB-based Charging Interface

Model M2 - microUSB Interface Charger

Model K5 - USB-Type C Interface Charger

4. Places of Usage

Disinfects and sanitizes any surfaces!...

Homes

Offices

Hotels

Gym

Cars

Leisure Centres

Bathrooms

School

and many more!...

5. Cautions

DO NOT use alcohol-based disinfectant solution when using this nano mist sprayer / atomizer.

Alcohol-based disinfectants are high flammable which is a fire hazard if an ignition source is present

6. Technical Specifications

Model K5

Model: K5

Size: 22.3 x 6.5 x 19.2cm

Weight: 470g

Power: 15W

Bottle Capacity: 380ml

Spray Distance: Up to 1.5m

Battery Capacity: 2000mAh

Charging Voltage: DC5V / 1A

Model M2

Model: M2

Size: 23 x 5.6 x 20.5cm

Weight: 530g

Working Voltage: DC 3.7V

Power: 5W

Bottle Capacity: 650ml

Spray Distance: Up to 2.0m

Battery Capacity: 1800mAh

Charging Voltage: DC5V

About our Pure™ Antimicrobial Concentrate Disinfectant

Nano Mist Sprayer / Atomizer is compatible with our

Pure™ Antimicrobial Concentrate Alcohol-free

Hospital-grade disinfectant, it kills 99.9% of bacteria and viruses as well as removing odour, mould and mildew.

For a complete Independent Lab Testing Summary of the viruses / bacteria, kindly refer to our page regarding "*Pure™ Antimicrobial Concentrate Alcohol-free Hospital-grade Disinfectant*".

INSTRUCTIONS

K5 Model

- 1** Remove the bottle from the machine by turning clockwise

- 2** Fill the bottle with Pure™ Antimicrobial Concentrate Alcohol-free Hospital-grade Disinfectant

- 3** Secure the bottle by turning anti-clockwise

- 4** Start Misting by pressing the “M” button

AFTER USAGE OF NANO MIST SPRAYER / ATOMIZER

1. Empty left over antimicrobial concentrate from the bottle.
2. Fill the bottle with tap water and spray to rinse out any remaining antimicrobial concentrate.

INSTRUCTIONS

M2 Model

- 1** Remove the bottle from the machine by turning clockwise

- 2** Fill the bottle with Pure™ Antimicrobial Concentrate Alcohol-free Hospital-grade Disinfectant

- 3** Secure the bottle by turning anti-clockwise

- 4** Start Misting by pressing the “ON / OFF” button

AFTER USAGE OF NANO MIST SPRAYER / ATOMIZER

1. Empty left over antimicrobial concentrate from the bottle.
2. Fill the bottle with tap water and spray to rinse out any remaining antimicrobial concentrate.

{ULV Cold Fogger / Nano Mist Sprayer Atomizer}

Wired ULV Cold Fogger Model S2

ULV stands for ultra-low volume and it works by using air mass at low pressure to convert liquid into fine droplets which are then dispersed into the air. The converted low volume of liquid are minuscule and measured in microns creating fog that covers a very large area.

Generally, ULV Cold Fogger are used both indoors and outdoors and an example of such application is environmental cleaning by spraying disinfectant solution. As fine droplets, it retains longer in the air and contacts airborne viruses / bacteria / microorganisms effectively neutralizing them.

KILLS

{ULV Cold Fogger / Nano Mist Sprayer Atomizer}

An advantage of using ULV Cold Fogger is its cost savings when using in the long run as it uses a small amount of disinfectant solution and the fog covers large area while disinfecting every inch of space and even the smallest of nooks and crannies like corners and ceilings where bacteria and viruses conceal.

As a gardening tool, ULV Cold Fogger allows you to water plants / flowers / trees as well as applying pesticides.

Pure™ Antimicrobial Concentrate (Alcohol-free Hospital-grade Disinfectant)

By utilizing our Pure™ Antimicrobial Concentrate is an alcohol-free hospital-grade disinfectant that kills 99.9% of viruses and bacteria as well as removing odour, mould and mildew. It is Made in USA and is EPA(USA) and National Environment Agency(NEA) of Singapore registered.

For a complete Independent Lab Testing Summary of the viruses / bacteria, kindly refer to our page regarding "*Pure™ Antimicrobial Concentrate Alcohol-free Hospital-grade Disinfectant*".

Cordless Knapsack ULV Cold Fogger Model S3

Technical Specifications

Product Size: 96.6 x 26.8 x 13.6cm

Rated Voltage: AC 220-240V

Rated Power: 800W

Power Cord Length: 5m

Tank Capacity: 5L

Weight: 2.7KG

Spray Volume: 80-100ml/min

Spray Distance: 5-7m

Model S2

Droplet Size: < 50µm

Windless Environment: > 8m

Model S3

Product Size: 47.73 x 18.95 x 46.2cm

Battery Capacity: 15Ah (15000mAh)

Power / Voltage: 240W, 24V

Tank Capacity: 8L

Weight: 5.6KG

Droplet Size: < 35µm - 60µm

Spray Volume: 120-180ml/min

Spray Distance: 5-8m

Cautions

DO NOT use alcohol-based disinfectant solution when using ULV Cold Foggers.

Alcohol-based disinfectants are highly flammable which is a fire hazard if an ignition source is present

{ Antimicrobial Concentrate/Hospital Grade Disinfectant }

“

*Developed to neutralize Micro-organisms
which create havoc to our daily lives*

”

All anti-viral anti-bacterial and anti-fungal efficacy testing were carried out by qualified independent laboratories and the product is registered with United States Environmental Protection Agency. It is highly effective against viruses, bacteria and fungus.

It has vast application capabilities which include water purification process, disinfectant and as an approved cleaner for food contact surfaces by NSF International Certification. It is also suitable for use in water air purifier / revitalizer together with Pure™ Aroma Essence for creating healthier, cleaner and pleasant air at home and workplace.

Pure™ Antimicrobial Concentrate Disinfectant is a disinfectant and deodorizer proven to kill bacteria, fungus and viruses.

It can be used on non-porous environment hard surfaces, in home, hospitals, nursing home, medical and dental clinics, laboratories, ambulance and patient transfer vehicles, funeral homes, hotels, restaurants, schools, day care centres, offices, veterinary clinics, animal shelters, exercise facilities, beauty and hair salons, trains buses and other public transportation vehicles. locker rooms, kitchens and restrooms, etc.

We cater both original (odourless) and scented type.

If your preference is scented, please indicate your choice of scent when placing an order.

Sizes available:

- 60ml • 250ml(Flip Cap / Sprayer) • 500ml • 2 Litres • 5 Litres • 10 Litres • 25 Litres

Active Ingredients:

- Chlorine Dioxide (0.200%)
- Alkyl Dimethyl Benzyl Ammonium Chloride (0.125%)
- Alkyl Dimethyl Ethylbenzyl Ammonium Chloride (0.125%)
- Inert Ingredients (99.550%)

Benefits

- Kills harmful bacteria and viruses within 10 seconds
 - Removes odour, mold and mildew
 - Non-irritation to skin and safe to human
 - Product is environmentally friendly
 - 100% Biodegradable, alcohol-free and non-flammable
 - Eliminates 99.9% of bacteria and viruses;
- (Porcine Epidemic Diarrhea Virus, Rotavirus, Norovirus, Feline Coronavirus, Canine Coronavirus, H1N1, Influenza B, Respiratory Syncytial Virus, Hantavirus, Herpes Simplex Virus, Hepatitis Virus, HIV Type 1, Aspergillus Niger, MRSA, E-coli, Staphylococcus Aureus, Salmonella Enterica, Legionella Pneumophila, Adenovirus 1 & many more contagious viruses!)

Usage of Pure™ Antimicrobial Concentrate Disinfectant

In water air revitalizer (Diluted Application)

To be used together with Pure™ Aroma essences for promotion better air quality.

- Fill air revitalizer bowl with 1500ml of clean water or slightly above mid-level.
- After adding Pure™ Aroma essence into water, squeeze 1-2 squirts or approximately 10ml of Pure™ Antimicrobial Concentrate Disinfectant.
- Replace air revitalizer cover and switch on power supply

For General Cleaning (Diluted Application)

- Add 2 - 3 squirts of Pure™ Antimicrobial Concentrate Disinfectant per litre of water and clean area and surface with sponge, mop or cloth.

To Disinfect Hard Surfaces (Concentrated Applications)

- Apply full strength to surface, wetting thoroughly with spray sponge and mop by immersion in Pure™ Antimicrobial Concentrate Disinfectant.
- Allow surfaces to remain wet for 10 minutes.

As An Odour Eliminator / Prevention of Mold and Mildew (Concentrated Application)

- The Pure™ Antimicrobial Concentrate Disinfectant must come into direct contact with offending odour and use it undiluted. After treatment, we highly recommend using our Pure™ Aroma Essence to enjoy better air quality and experience the holistic practice of Aromatherapy.

- Pure™ Antimicrobial Concentrate Disinfectant is safe to use around children. Use to disinfect children's toys, playpens, playhouse, diaper changing tables, strollers, cribs, child car seats, play tables, etc.

- Eliminating bacteria, viruses and fungus can involve strong chemicals that can trigger health problems, but our Pure™ Antimicrobial Concentrate Disinfectant controls mold and bacteria by oxidizing it instead of bleaching it. It is so mild, you can wash your hands in it but it is tough on bacteria, viruses, fungus thereby providing a safer living environment.

Some Useful Tips To Remove Odours

Odours from Home / Office Air Conditioning System

Fungal spores and bacteria thrive in moist surfaces and when released into the air, these micro-organisms trigger allergies, cause illnesses and produce odours. Pure™ Antimicrobial Concentrate Disinfectant is highly effective in eliminating bacterial and fungal organisms found in air conditioners.

- Switch off electrical supply to air-con at main socket
- Remove air-con filter and wash away dust and dirt
- Spray Pure™ Antimicrobial Concentrate Disinfectant directly on cooling fins until wet but avoid spraying at or near electrical circuitry
- Wipe off excess moisture flowing down the cooling fins
- Replace cleaned filter into air-con and switch on the air-con

It is recommended to perform the above at least once a month. During the quarterly servicing of your air-cons, you may hand the Pure™ Antimicrobial Concentrate Disinfectant to the servicemen for thorough disinfection of all vents, cooling fins and pipes or air ducts of the air-con system.

Carpet / Curtain / Fabric Odours

- Spray / wet and brush area with Pure™ Antimicrobial Concentrate Disinfectant. This includes underneath or behind
- Allow to dry
- If odour persists, repeat the above procedure.

For liquid spills etc, use Pure™ Antimicrobial Concentrate Disinfectant together with carpet or upholstery shampoo.

Odours On Floors

- Squeeze 3 - 4 squirts of Pure™ Antimicrobial Concentrate Disinfectant into bucket containing water together with floor cleaning solution.
- Mop or wipe as usual and you will be pleasantly surprised with the results.

Pets Odours

- Spray Pure™ Antimicrobial Concentrate Disinfectant directly onto pet bedding or holding cages.
- Brush into surface and reapply if necessary.
- Pat dry with a cloth or sponge and let air dry.

To control urine and faecal odours, a daily treatment of 4 -6 sprays directly onto the spot and brush Pure™ Antimicrobial Concentrate Disinfectant into the surface, pat dry, reapply and let air dry.

Kitchen Odours and As Kitchen Disinfectant

Pure™ Antimicrobial Concentrate Disinfectant can remove most common kitchen odours, even the foul odours of garbage disposals and drains.

- To treat sinks, fill basin with 1/4 full with hot water.
- Add 1 squirt of Pure™ Aroma Essence (any scent) together with approximately 100ml of Pure™ Antimicrobial Concentrate Disinfectant.
- Stir and mix well, then release Antimicrobial into the drain.
- When basin is empty, run cold water down the drain for 20 seconds and then spray Pure™ Antimicrobial Concentrate Disinfectant into the drain.

To Sanitize Food-Contact Surfaces:

- Mix 9-parts water to 1-part Pure™ Antimicrobial Concentrate Disinfectant.
- Spray onto surface from a distance of 6-8 inches, wetting thoroughly.
- Let stand for 1 minute (or longer if specified by government sanitary code).
- Allow surface to drain or air dry. Do not rinse or wipe.

To Sanitize Non-Food-Contact, Non-Porous Surfaces:

- Mix 9-parts water to 1-part Pure™ Antimicrobial Concentrate Disinfectant.
- Spray onto surface from a distance of 6-8 inches, wetting thoroughly. • Let stand 5 minutes.
- Wipe and allow to air dry. No rinse required.

Odours From Car Air Conditioning Units

- Stop the engine and spray 2 - 3 trigger sprays into the drain for 30 seconds and then spray Pure™ Antimicrobial Concentrate Disinfectant into the drain.
- Start the vehicle engine and turn the fan on high cool.
- Spray 10 - 20 times into the outside fresh air intake vent (located under the cowl at the base of the windshield).
- Let vehicle run for 2 - 3 minutes.
- Wipe off any excess moisture coming out of the dashboard vents.
- With windows closed, turn your air-con system to Max air or re-circulation.
- Spray 5 - 10 times into the air in general, close vehicle doors and let it run for 4 - 6 minutes.

This should leave your vehicle not only odourless but most importantly free from harmful bacteria.

To enjoy fresh and beautiful scent, you may use our Car Revitalizer together with Pure™ Range of Aroma Essences.

Other Uses

- Bathroom/ toilet cleaner, while travelling, carry Pure™ Antimicrobial Concentrate Disinfectant in a handy spray bottle as a disinfectant to sanitize and prevent contact diseases.
- Also effective in removing odours in shoes and shoe cabinets by simply spraying and let air dry. The Pure™ Antimicrobial Concentrate Disinfectant eliminates germs (i.e. source of odour) found in shoes.

{ 70% Ethanol/Ethyl Alcohol v/v }

Instant Hand Sanitizer

A sanitizer for your loved ones!

Sizes Availability

60ml, 120ml, 250ml, 500ml, 1 litre, 2 litres, 5 litres

KILLS

How it works

The bacterial cell is exposed to a solution of this alcohol, this causes the molecules of the bacteria's cell membrane to be infused with alcohol molecules and cause the bacteria's cell membrane to fall apart.

As the proteins suspended within the membrane of the bacteria begin to grow weaker, the alcohol molecules begin to dissolve the proteins of the bacteria.

A process called "denaturation" takes place and eventually, the bacteria cannot survive without those protein functions and dies.

70% Ethyl Alcohol is in the list of effective active ingredients against coronaviruses

Recommendations are based on the information of the active ingredients and concentrations declared by the suppliers.

Table 2. Active Ingredients and Their Working Concentrations Effective Against Coronaviruses

S/N	Active Ingredient (A.I.)
1	Sodium hypochlorite (0.05 – 0.5%) ^{1,2}
2	70% Ethyl alcohol ¹ 
3	Povidone-iodine (1% iodine) ¹
4	Chloroxylenol (0.12%) ³
5	50% Isopropanol ⁴
6	0.05% Benzalkonium chloride* ⁴
7	50 ppm Iodine in iodophor ⁴
8	0.23% Sodium chlorite ⁴
9	Accelerated hydrogen peroxide (0.5%) ⁵

Our Ethanol 70% has been tested by TÜV SÜD PSB for safety

Test Report: 7191260404-CHM21-JC

{ Standard Deluxe Aroma Mist Spray /
Mini Deluxe Aroma Mist Spray }
(Pillow/Linen/Room Freshener)

“ *Mist or Spritz wherever you want it most and
reap the benefits of Aromatherapy!* ”

NEW Extra Strong
Available now!

{Deluxe Aroma Mist Spray}

Immerse yourself in a luxurious environment with our Deluxe Aroma Mist Spray as part of our range of aromatherapy products that refreshes your environment.

Use our spray to enhance the air around you and enlighten it as environment factors has the power to affect one's state of mind.

Thinking back of a particular place you've been before? You can now mimic your nostalgic environment as you wish with our wide range of fragrances collection.

Since our essential oils are made from botanical extracts, it is safe to spray and enhance your environment while relieving your tension, mental fatigue and exhaustion.

Model

AMS01

3.38fl.oz. U.S.

Model

AMS02

Materials

- Anodized Aluminium Casing
- Inner Glass Bottle

Capacity

8ml

Contains

Essential Oils, Fine Fragrances, Perfumer's Alcohol

Restore your positive energy while cleansing airborne germs with its antibacterial properties.

Mist wherever you want it most, indulge yourself now!

Made in Singapore

{Deluxe Aroma Mist Spray}

Usages

Home

Remove dullness and mundanity by refreshing your home with our tranquil and relaxing scents.

Office

Lift the mood of the office and de-stress your working environment by making it more lively with some uplifting scents!

Linen Sofa

Enjoy your leisure activities while the fragrance linger around you to make your day more excitable!

Pillow

At the end of a long day, have a bacteria free pillow and soothe yourself with calming aroma while enjoying the benefits of aromatherapy as you have a good night rest.

{Deluxe Aroma Mist Spray}

Usages

Wardrobe

Feel more revitalized and be ready to face the day from the moment you open your wardrobe with our fragrance!

Curtain

Take advantage of the wind as it blows through the curtains with our fragrance and eliminate harmful bacteria to provide a refreshing environment.

Storeroom

Rid unwanted odours by replacing it with our vibrant fragrances.

Shoe Cabinet

Get rid of odours and bacteria that are lurking in your shoe cabinets and replace them with a welcoming fragrance.

Odour Eliminator

Eliminate odours by spraying onto objects to kill the causing bacteria and replace it with an ecstatic and uplifting fragrances.

{Deluxe Aroma Mist Spray}

Usages

Hotel Room

Enhance the room with a luxurious fragrance to make your environment more enjoyable!

Bathroom

Feel more relaxed, less fatigue and reminisce with pleasing scents as you use the bathroom.

Car

Enjoy aromatherapy while you drive as you surround yourself with natural aromas that deodorize unpleasant odours with refreshing scents.

{ Wooden Aroma Diffuser }

“ *The wooden cover functions as a wick which allows the aroma oil to diffuse into the air subtly* ”

Extreme conditions may induce excessive volatility of the aroma oil thus shortening the scenting duration of this Wooden Aroma Diffuser

Ranges from 5ml and 10ml

{ Wooden Aroma Diffuser }

Neutralize unpleasant odours and provide a delightful scent to the air of smaller indoor spaces such as :

Desktop

Wardrobe

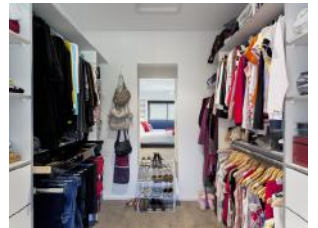

In the car

Bathroom

Shoe cabinet

Storeroom

Usage Guide

1 Unscrew the wooden cover and remove the stopper in the bottle; screw back the cover tightly.

2 Flip over the bottle for 3-5 seconds for the wooden cover to absorb the aroma oil (Repeat No.2 process once per week or when needed for the extra intensity of fragrance.)

3 Secure and tie the string around the rod of pole of bathroom fittings / wardrobe. For desktop, simply placed bottle in an upright position after inverting it.

Caution

Please do not fiddle with this wooden Aroma Diffuser while driving for safety.
Avoid contact of Aroma oil with any painted/plastic surface or fabric to avoid staining.
Flammable product, do not light and keep away from open flame.
Keep away from children and pets.

{Wooden Aroma Diffuser}

Fragrances Available :

Apricot Peach

Heavenly scent which is pleasing, delightful & all time favourite deodorizer

Citronella

Repels mosquitoes and insects

Creative Wednesday

An ambience that lavishes plentiful inspirations throughout the day.

Eucalyptus

Improves asthma and upper respiratory tract infection, eases bronchitis, sinus, flu

Floral

Blend of flowers for tranquility and extremely useful for relaxation

Fortune

Evoking thoughts of happiness and prosperity, inspiring oneself to succeed

Grapefruit

Refreshing and relaxing. Encourages cheerful emotion ideal for depression

Lavender

Relieves emotional stress, depression and calms one's mind

Lemongrass

Repels insects, antiseptic and good for use in open area

Mango

A popular tropical sweet scent which exudes a delicious and memorable fragrance

Orchid

Creates a relaxing and happy aroma which promotes alertness and strengthens the spirit.

Pandan

Have a strong sweet and refreshing aroma which is uplifting and harmonizing, able to repel insect pests.

Peace

Helps calm tensions and brings happiness to the mind.

Peppermint

Excellent for indigestion, nausea, diarrhoea, colitis and sinus congestion

Romance

Lovingly blended to bring you & partner a pleasurable feeling

Shangri-La

An exotic & masculine scent which exudes mystery and creates a luxurious atmosphere.

Spring

Symbolizes new beginnings and hopes. This fresh scent brings the promise of Spring

Summer

Showering joy, energizes one's mind and evokes a sense of freedom

Singapore renowned company established in 1990
 Facemask performance certified by Accredited US
 Laboratory with minimum 95%
 Bacteria, Particulate, Viral Filtration Efficiency

COOLLING MASK

- ✓ Fresh Minty scents cover stale breath when facemask is donned for long hours.
- ✓ Cool scent will be released only when beads are popped.
- ✓ Scented beads are sealed on edge of facemask not affecting the Filtration

FACEMASK DONNING METHODS

Facemask with scented balls.

Place earloops over the ears.

Press nosepiece conforming to nose bridge.

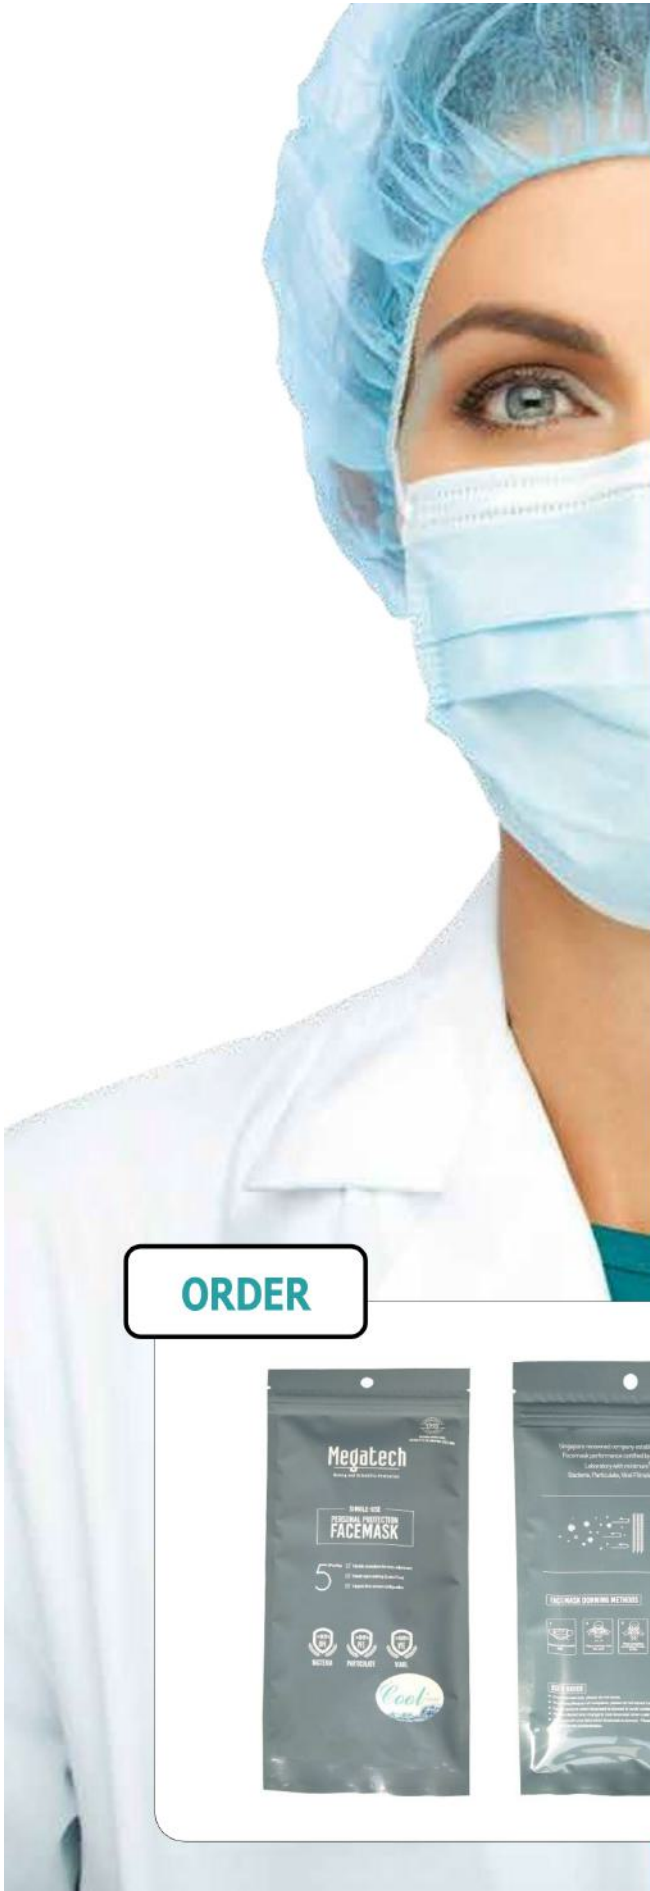

Open the mask to fit on face.

Press hard to break scented balls.

USER GUIDE

- One-time use only please do not reuse.
- To pulling (flexion) of nosepiece, please do not repeat bending when used.
- Do not remove when facemask is donned to avoid contamination.
- Please discard and change to new facemask when outer layer is damaged or contaminated.
- Do not touch your face when facemask is donned. Please wash your hands after touching to prevent cross contamination.

{ 3-Ply Disposable Face Mask With Aromatherapy Peppermint Beads }

PRODUCT SPECIFICATIONS

Description:	Disposable 3-ply Face Mask with Scented beads
Model:	3PEL/2AB175NB-SCT2-5PC
Length of Mask:	175 mm ± 2 mm
Width of Mask:	95 mm ± 2 mm
Inner Facing Layer:	Polypropylene Spunbond Non-woven, White
Filter Center Layer:	Polypropylene Meltblown Non-woven
Outer Mask Layer:	Polypropylene Spunbond Non-woven, Blue
Ear Band:	Nylon Band
Scented Beads:	2 pcs of beads with Peppermint Essence Oil
Packaging:	5pcs/bag, 200bags/carton

ABOUT

Providing excellent Bacteria, Viral and Particle filtration efficiency. Megatech's FDA Class II Medical Facemask is manufactured from highest quality materials ensuring wearers comfort and protection at all times.

Bacterial Filtration Efficiency (BFE) and Differential Pressure (Delta P) Final Report

Test Article: DISPOSABLE 3-PLY FACEMASK
LOT #I 2020 (02-06)
Purchase Order: PO2020-034
Study Number: 1281400-S01
Study Received Date: 26 Mar 2020
Testing Facility: Nelson Laboratories, LLC
6280 S. Redwood Rd.
Salt Lake City, UT 84123 U.S.A.
Test Procedure(s): Standard Test Protocol (STP) Number: STP0004 Rev 18
Deviation(s): None

Summary: The BFE test is performed to determine the filtration efficiency of test articles by comparing the bacterial control counts upstream of the test article to the bacterial counts downstream. A suspension of *Staphylococcus aureus* was aerosolized using a nebulizer and delivered to the test article at a constant flow rate and fixed air pressure. The challenge delivery was maintained at $1.7 - 3.0 \times 10^3$ colony forming units (CFU) with a mean particle size (MPS) of $3.0 \pm 0.3 \mu\text{m}$. The aerosols were drawn through a six-stage, viable particle, Andersen sampler for collection. This test method complies with ASTM F2101-19 and EN 14683:2019, Annex B.

The Delta P test is performed to determine the breathability of test articles by measuring the differential air pressure on either side of the test article using a manometer, at a constant flow rate. The Delta P test complies with EN 14683:2019, Annex C and ASTM F2100-19.

All test method acceptance criteria were met. Testing was performed in compliance with US FDA good manufacturing practice (GMP) regulations 21 CFR Parts 210, 211 and 820.

Test Side: Inside
BFE Test Area: $\sim 40 \text{ cm}^2$
BFE Flow Rate: 28.3 Liters per minute (L/min)
Delta P Flow Rate: 8 L/min
Conditioning Parameters: $85 \pm 5\%$ relative humidity (RH) and $21 \pm 5^\circ\text{C}$ for a minimum of 4 hours
Test Article Dimensions: $\sim 175 \text{ mm} \times \sim 160 \text{ mm}$
Positive Control Average: 1.8×10^3 CFU
Negative Monitor Count: < 1 CFU
MPS: $3.1 \mu\text{m}$

Study Director:  James W. Luskin

CE EN14683: 2019

Study Number 1281400-S01
Bacterial Filtration Efficiency (BFE)
and Differential Pressure (Delta P) Final Report

Results:

Test Article Number	Percent BFE (%)
1	99.9
2	99.9
3	99.9
4	99.9
5	99.9

Test Article Number	Delta P (mm H ₂ O/cm ³)	Delta P (Pa/cm ²)
1	4.5	43.8
2	4.4	42.7
3	4.4	43.0
4	4.6	44.9
5	4.4	43.5

The filtration efficiency percentages were calculated using the following equation:

$$\% BFE = \frac{C - T}{C} \times 100$$

C = Positive control average

T = Plate count total recovered downstream of the test article

Note: The plate count total is available upon request

Latex Particle Challenge Final Report

Test Article: DISPOSABLE 3-PLY FACEMASK
 LOT #1 2020 (02-06)
 Purchase Order: PO2020-034
 Study Number: 1281399-S01
 Study Received Date: 26 Mar 2020
 Testing Facility: Nelson Laboratories, LLC
 6280 S. Redwood Rd.
 Salt Lake City, UT 84123 U.S.A.
 Test Procedure(s): Standard Test Protocol (STP) Number: STP0005 Rev 07
 Deviation(s): None

Summary: This procedure was performed to evaluate the non-viable particle filtration efficiency (PFE) of the test article. Monodispersed polystyrene latex spheres (PSL) were nebulized (atomized), dried, and passed through the test article. The particles that passed through the test article were enumerated using a laser particle counter.

Three one-minute counts were performed, with the test article in the system, and the results averaged. Three one-minute control counts were performed, without a test article in the system, before and after each test article and the counts were averaged. Control counts were performed to determine the average number of particles delivered to the test article. The filtration efficiency was calculated using the average number of particles penetrating the test article compared to the average of the control values.

The procedure employed the basic particle filtration method described in ASTM F2299, with some exceptions; notably the procedure incorporated a non-neutralized challenge. In real use, particles carry a charge, thus this challenge represents a more natural state. The non-neutralized aerosol is also specified in the FDA guidance document on surgical face masks. All test method acceptance criteria were met. Testing was performed in compliance with US FDA good manufacturing practice (GMP) regulations 21 CFR Parts 210, 211 and 820.

Test Side: Inside
 Area Tested: 91.5 cm²
 Particle Size: 0.1 µm
 Laboratory Conditions: 20°C, 23% relative humidity (RH) at 0853; 21°C, 23% RH at 1216
 Average Filtration Efficiency: 99.81%
 Standard Deviation: 0.056
